2 Description of the Supply Base

2.1 General description

In the reporting period, “GRANTOP-EXPORT” LLC purchased secondary feedstock from 5 sawmills having FSC certificates. The suppliers in their turn buy feedstock (certified as well as controlled) from Republic of Komi, Arkhangelsk, Vologda, Kirov, Yaroslavl regions and other regions of Russia, so the description of the supply base is given nationwide.

The total area of forest lands in Russia is 764 mln. ha, accounting for about 21% of the world standing timber. Coniferous species makes up 68,4%, hard-wooded broadleaved species – 2,4%, soft-wooded broadleaved species – 19,3%. Other tree species makes up less than 1%.

In accordance with Russian legislation all forest lands are state owned. Legal entities can use forest areas in lease and short-term use. Lease relations are the dominant legal form of forest use. The lease term may continue from 10 to 49 years.

Entering into the lease agreement of forest lands or sale contracts of forest plantations is carried out at the auction for selling the right to enter into such agreements. Forest areas for a lease must pass a state cadastral registration. According to the Forestry Code of the Russian Federation every forest user taking a lease forest land is obliged:

- to implement measures on forest conservation, protection and regeneration,
- to provide annual forest declaration,
- to issue a forest exploitation project,
- to provide a report on the forests use, their conservation, protection and regeneration.

High quality reproduction of forest resources and protective forestation is a prerequisite for forest management. All reforestation activities within leased forest areas are planned and carried out by forest users at their own expense in accordance with the forest exploitation projects.

The forest complex of the Russian Federation including forestry as well as wood harvesting and wood processing industries, plays an important role in Russian economy. About 60 000 of large-scale, medium-sized and small enterprises in all regions of the country are involved in Russian forest complex. The total number of employees in the forest complex of Russia is about 1 mln. people.

Forest certification is an effective tool for combating illegal wood harvesting and wood trade. The system of FSC (Forest Stewardship Council) certification is widely used in Russia. Certified forests area in Russia is about 40 mln. ha, or 30% of the total number of leased forests. The dynamics of forest certification in Russia shows the ever-increasing activity of wood companies which indicates the responsibility to ensure the legality of wood harvested and compliance with environmental and other requirements.

The supply base of “GRANTOP-EXPORT” LLC

The supply base of “GRANTOP-EXPORT” LLC is the total area of forest land of Russia on the whole. The total area of the supply base is 764 mln. ha.

Coniferous forests (pine, spruce), which are not included in CITES and international agreements on environment protection, form the most part of the supply base.

Forest management is based on achievement of inexhaustible sustainable use of forest resources according to the requirements of forest laws and forest certification principles, if applicable. Rotation period is 60-120 years. One or two thinnings and clearcut of mature forest with forest regeneration are made during rotation period. Seedlings planting or natural forest regeneration can be used for forest regeneration. Inexhaustible use of forest resources is also implemented. Inexhaustible use of forest resources is based on 15 – 20-year cycle of harvesting with selective harvesting and viable young growth retaining.

Intact forests and wetlands of international importance are located at the territory of Russia. Small-numbered indigenous nations live here. So in order to minimize the risk of wood of unknown origin in FSC Chain of Custody, “GRANTOP-EXPORT” LLC buys only FSC certified feedstock from FSC certified suppliers.

“GRANTOP-EXPORT” LLC works with 5 sawmills supplying FSC certified saw-milling waste. If “GRANTOP-EXPORT” LLC ramps up the production volume, it will use only FSC certified saw-milling waste. In the reporting period, “GRANTOP-EXPORT” LLC received secondary feedstock with FSC Mix Credit claim from two suppliers, and feedstock with FSC 100% claim – from the three supplier. This feedstock refers to the category - SBP-compliant feedstock.

Under current conditions “GRANTOP-EXPORT” LLC has an opportunity to produce pellets with SBP-compliant biomass claim. All supplied resources belong to the category of “SBP-compliant secondary feedstock”. Sawdust, wood chips and bark for production and heat generation are used as feedstock.

“GRANTOP-EXPORT” LLC uses only FSC certified wood chips for heat generation.

Proportion of the species of supplied resources is 70 % - pine (*Pinus sylvestris*), 30% - spruce (*Picea abies*). “GRANTOP-EXPORT” LLC is of a great socio-economic importance in Vologda region. The company is involved in charity events, provides financial support for sociocultural objects and organisations, sport organisations (rural settlements, schools, museums, churches, veterans' communities).

Forest industry in Russia is one of the leading industries speaking from the perspective of working population involved and the volume of tax deductions to all budget levels.

2.2 Actions taken to promote certification amongst feedstock supplier

In 2016 a great work on the staff training in accordance with FSC criteria was done. "GRANTOP-EXPORT" LLC was certified (FSC certificate FSC NC-COC-026273). The Production is carried out with the claim FSC Mix Credit.

"GRANTOP-EXPORT" LLC uses only FSC certified feedstock for production of FSC certified pellets. "GRANTOP-EXPORT" LLC buys FSC certified feedstock for higher price and it can encourage potential suppliers to gain FSC certification.

"GRANTOP-EXPORT" LLC hopes that this mutually beneficial and long-term cooperation with certified feedstock suppliers will become a good example of product promotion and sustainable forest use according to FSC principles for other companies.

2.3 Final harvest sampling programme

Not applicable, as saw-milling waste is used.

2.4 Flow diagram of feedstock inputs showing feedstock type [optional]

2.5 Quantification of the Supply Base

Supply Base

- a. Total Supply Base area (ha): 764 mln. ha
- b. Tenure by type (ha): 764 mln. ha public owned by the Russian Federation
- c. Forest by type (ha): 764 mln. ha boreal
- d. Forest by management type (ha): 764 mln. ha managed natural
- e. Certified forest by scheme (ha): 43,5 mln. hectares of FSC-certified forest

Feedstock

- f. Total volume of Feedstock: 11530,7m³
- g. Volume of primary feedstock: 0 m³
- h. List percentage of primary feedstock (g), by the following categories, subdivide by SBP-approved Forest Management Schemes:
 - Certified to an SBP-approved Forest Management Scheme – 0%
 - Not certified to an SBP-approved Forest Management Scheme – 0%

Not applicable. Only secondary feedstock (with claims FSC Mix Credit, FSC 100%) is used.

- i. List all species in primary feedstock, including scientific name

Not applicable.

- j. Volume of primary feedstock from primary forest

Not applicable (0 m³)

- k. List percentage of primary feedstock from primary forest (j), by the following categories. Subdivide by SBP-approved Forest Management Schemes:
 - Primary feedstock from primary forest certified to an SBP-approved Forest Management Scheme – 0%
 - Primary feedstock from primary forest not certified to an SBP-approved Forest Management Scheme – 0%

Not applicable. Primary feedstock from primary forest is not used.

- l. Volume of secondary feedstock: specify origin and type: 11530,7 m³ of wood dust and chips (secondary feedstock)

m. Volume of tertiary feedstock: Not applicable (0 m3).

3 Requirement for a Supply Base Evaluation

SBE completed	SBE not completed
<input type="checkbox"/>	X

100% of all pellet production has FSC MIX claim, so SBE was not required.

4 Supply Base Evaluation

4.1 Scope

Not applicable.

4.2 Justification

Not applicable.

4.3 Results of Risk Assessment

Not applicable.

4.4 Results of Supplier Verification Programme

Not applicable.

4.5 Conclusion

Not applicable.

5 Supply Base Evaluation Process

Not applicable.

8.2 Site visits

Not applicable.

8.3 Conclusions from the Supplier Verification Programme

Not applicable.

9 Mitigation Measures

Not applicable.

9.1 Mitigation measures

Not applicable.

9.2 Monitoring and outcomes

Not applicable.

10 Detailed Findings for Indicators

Not applicable.

11 Review of Report

11.1 Peer review

The report was not reviewed this year.

11.2 Public or additional reviews

Supply base report of “GRANTOP-EXPORT” LLC will be available on the website www.bio-teplo.com. All questions and remarks, if any, can be to e-mail: zenkoval-2007@yandex.ru

12 Approval of Report

Approval of Supply Base Report by senior management		
Report Prepared by:		
	Zenkov A.G.	SBP Responsible
The undersigned persons confirm that I/we are members of the organisation's senior management and do hereby affirm that the contents of this evaluation report were duly acknowledged by senior management as being accurate prior to approval and finalisation of the report.		
Report approved by:		
	Zenkova S.E.	Director

13 Updates

13.1 Significant changes in the Supply Base

There were no significant changes in Supply Base in the reporting period.

13.2 Effectiveness of previous mitigation measures

Not applicable.

13.3 New risk ratings and mitigation measures

Not applicable.

13.4 Actual figures for feedstock over the previous 12 months

11530,7 m³.

13.5 Projected figures for feedstock over the next 12 months

11500 m³.
